To Whom It May Concern;

RE: Public Consultation Paper: Registered medical practitioners who provide cosmetic medical and surgical procedures

I've been receiving injectable treatment for the past 3.5years. I have been so pleased with my treatments and I cannot fault my nurse in any way. My results are always amazing. She always has time for any questions and the treatment is always done very professionally. I really enjoy that not only do I speak to my nurse about my concerns but I also have the opportunity to speak to her doctor through live realtime video. I feel like I have the opinion of a second person also which is a bonus!

To add to all this the beauty salon in which I attend is always immaculate which makes it all that more appealing to me.

I've personally had three years of great service with excellent results always.

I don't see why anything should change. My nurse is knowledgable, careful and a very professional individual that always follows protocol to give the best service and results to me. Please don't take this away from us. I would be devastated.

Sincerely
