Subject: Re: Medical Board Proposal

To whom it may concern,

I am disappointed to hear of possibility of unrealistic legislation changes of the presence of doctors in treatments clinics for face to face consultations, not only is this unnecessary but not financially viable for the clinic to remain in operation.

I have been a client at Skintopia/ Anti-Aging for many years undergoing many successful injection treatments under the professional care of Vicki Wagner after a GP appointment via video link communications. I feel this current practice is professional, informative and am made well aware of the treatment outcomes, different alternatives, side effects and any possible complications and risks involved with the desired treatment, this consultation allows me to voice any concerns I may have and ask any questions to a qualified practitioner while in the comfortable personal setting of the clinic, I in fact feel the level of care given to me during these appointments to be of a much higher standard than a regular GP visit.

I would be saddened and inconvenienced to see such a popular, well presented and professional clinic close its door due to unnecessary endorsement of this legislation and hope that it will be reviewed in due course.

Kind Regards

Edna [REDACTED]
