Subject: Consultation-Registration medical partitioners who provide cosmetic medical and surgical procedures

Dear Medical Board

I have know Trish Matheson for approximately 19 years. Trish has been providing professional consultations with the supervision of a doctor via real time video. Real time video was a comfortable experience and I was well informed. Trish has also spent the time with me discussing my past and present health conditions, discussed complications, side effects and I was more than happy to sign the consent forms.

From my first consultation and most recent visit to Trish, Trish still continues to discuss alternatives and discusses a plan of treatment. In the past I have seen a dermatologist and found the experience most uncomfortable, the time spent was not of Trish's standards and was most unsatisfied. My trust and confidence is of most respect and I trust Trish's work and knowledge. Trish's education has benefited me in a physical and professional way.
