Subject: Good Medical Practice

I am writing to you to let you know some concerns that you may have with the treatments that I receive.

I would like to inform you that I have been seeing my consultant for over year and find myself being treated on a professional basis (I have had treatment done elsewhere without the result and consultation that I receive now)

My Nurse has records on my treatments together with being supervised by a medical practioner

I am constantly supervised and frequently asked questions on medical conditions, medication that I may take and if I have any allergies.

I am kept up to date with medical treatments verbally and information that is given to me on hand.

I am asked if I have suffered from any complication that I may have.

I feel quiet comfortable with my nurse who treats my professionally and personally.
