

To Whom It May Concern

Re:- Cosmetic Injectors

I have been having Cosmetic Injectables by Trish Matheson from Anti-Aging for a number of years now.

I am more than happy with professionalism, hygiene and privacy I received with my treatment. I have felt that every question that I had was answered clearly, and I was given all the information I needed regarding side affects, cost of treatments, and which product would suit me best to obtain the result I was after.

My treatment consisted of a combined consult with Trish and a doctor via real time video, who also discussed, the treatment I wanted, any medication I was taking, allergies that I may have, and my overall health in general, which to me, felt no different than if I was sitting in the GPs consult room.

I am always given enough time to discuss with Trish any new treatments I would like to know about, and she provides me with information pamphlets on these treatments for my reading at home.

I always receive a follow up call from Trish a week after my treatment. When I read and signed my consent form, I could not have been more informed and comfortable.

Trish now comes to the Salon that I work at every two months and the feedback we have had from existing and new clients has been amazing.

Regards

Beverley
